

okuma

RIISING WITH EVERY CHALLENGE

The average person might stumble upon a remote beach and find inspiration in the texture of the sand, curl of the waves and the salty spice of the air. For the community of anglers, however, playing witness to nature is far less satisfying than direct participation.

As we approach every piece of water, our attention inevitably falls to what lies beneath the surface: beneath the waves, off the point, on the edge of structure, at the intersection of currents. It's the fish and their habits, their power and speed that captivate our attention. Through rod and reel we find our connection. Some call it sport. We call it a way of life that's rich with experiences.

At Okuma Fishing Tackle, our goal is to enhance every encounter. Integrating the latest advancements in materials and construction techniques is a means to downplay the presence of the gear. Eliminate weight and increase feel. Enjoy a running fish instead of fearing it. Button down the drag and go toe-to-toe with complete confidence. Your focus is not on the equipment; it's on the fish.

Wherever your travels take you, from the local pond to distant reef, we're proud to be your partner in the discovery of what lies beneath.

RODS

ROD TECHNOLOGY

UFR TECHNOLOGY

When choosing a rod, anglers often face the trade-off between a powerful but bulky rod that can catch big-sized fish, or a sensitive but weaker rod that can sense the bites of the smallest fish. We address this challenge with a revolutionary tip: Ultimate Flex Reinforcement (UFR), which redefines the future generations of rods.

Developed using a patented manufacturing process, the UFR tip combines strength and agility like never before, marking a breakthrough. Our UFR technology endows our rods with a 300% increase in lifting capability and an ability to bend up to 360°. With a longitudinal fibers around the rod blanks, our rods are more powerful, yet lighter and more flexible than traditional ones. As a result, our anglers no longer need to choose between power and sensitivity.

**FREEING
ANGLERS FROM
THE CHOICE
BETWEEN POWER
AND SENSITIVITY**

UMR TECHNOLOGY

Okuma's Ultimate Matrix Reinforcement (UMR) technology maximizes rod strength while minimizing weight, so you can rise to meet any challenge.

**LIGHTWEIGHT STRENGTH
BUILT FOR ANY CHALLENGE**

USR TECHNOLOGY

Okuma's USR technology, short for Ultra Strength Reinforcement, is an innovative carbon fiber wrapping technology for fishing rods. By utilizing a cross carbon wrap jacket, USR significantly enhances the performance of rod blanks. This advanced construction technique reinforces the structure of the blanks, resulting in increased strength and amplified power. With USR, fishing rods achieve a superior level of robustness and improved performance capabilities.

**ROBUSTNESS AND
IMPROVED PERFORMANCE**

Guide Select

CAST WITH CONFIDENCE

Okuma's Guide Select series covers a range of fishing techniques with professional-level performance provided by carefully selected components. From blanks with high-quality Japanese carbon and Okuma's UFR® tip technology to Sea Guide® line guides, the Guide Select Series is for those who want the equipment specifically designed for their style of fishing.

SPINNING

GUIDE SELECT VERTICAL SPINNING

The Guide Select Vertical Spinning rods are developed for vertical fishing. The rod blanks are shorter than average due to the fact that long casts are not in the center of this fishing style. In addition to this, shorter rod is easier to handle in the boat. Vertical Spinning has a sensitive tip yet enough power. This allows you to feel even the most sensitive strikes and hook the fish.

FEATURES

- 30t and 30+40t carbon
- Seaguide SS with Zirconia insert
- Fuji VSS reel seat for spinning
- Fuji TCSM reel seat for casting
- UFR Tip technology
- Premium EVA Grip

HELIOS SX

The Helios SX rods were designed with the latest technology and insight from leading bass anglers. The backbone of the Helios SX rods is the ultra-responsive and durable 30-ton carbon blank construction. This 30-ton carbon construction gives these rods the sensitivity you need to feel each bump and tick as you retrieve your bait. The Helios SX rods bring their lightweight technology into twelve key spinning and baitcast models. With five spinning models from 6-foot 9-inches to 7-foot 2-inches and light to medium heavy actions, they have you covered in your drop shop or other key spinning applications. The series also has seven casting models from 7-foot to 7-foot 6-inches and medium to heavy actions.

FEATURES

- 30T carbon construction
- Slim blanks with fast action
- Japanese split EVA handles
- Ergonomic touch blank screw-up reel seat
- CCS SIC Gunsmoke guides
- Customized Okuma butt cap
- Delivered in cloth bag

NEW

8K FEEDER

Introducing the second generation of our highly acclaimed 8K Feeder rod series, where we've taken the best features of the previous generation and elevated them with unique upgrades. Crafted with precision, each rod in the 8K Feeder 2nd generation series boasts a high module carbon construction, ensuring exceptional strength and durability without compromising on responsiveness. The thin blanks enhance overall performance, allowing for enhanced sensitivity. We are proud to present the innovative 'Sniper' tip design incorporated into every rod in the range. These detachable tips offer unrivaled sensitivity for bite detection, allowing you to increase your catch rate. Prepare to elevate your feeder fishing to new heights.

FEATURES

- High module carbon
- Thin blanks
- Fast response
- Supplied with 3 Innovative detachable 'Sniper' tips
- Sea-guide high quality components

MATCH/FEEDER

NEW

CUSTOM BLACK FEEDER

The next chapter of the Custom Black Feeder success story is here. Dedicated to delivering uncompromised and versatile performance for match and feeder anglers, the new Custom Black Feeder builds on the best-proven features of the series – and adds in a brand-new rod tip design. The series' thin high-modulus blanks pack enough power for long and accurate casts, but also deliver the fast and responsive action needed to land in species like carp, bream, and barbel. Finished with top-of-the-line cosmetics for that Custom Black Feeder look.

FEATURES

- High module carbon
- Thin blanks
- Fast response
- Supplied with 3 Innovative "Fishery" tips
- Unique ergonomic shaped handle for comfort
- High quality components
- Ergonomic rear grip

TELE SURF

NEW

DISTANCE

A member of Okuma's new range of surf casting rods, the Distance rod allows you to reach the faraway spots where the big ones lurk. The telescopic spinning rod is easy to store and carry, making it an ideal choice for the mobile angler with a preference for convenience. The Distance rod features a premium Fuji reel seat, a hybrid tip to increase bite detection, and a high-modulus carbon wrap to increase the blank's strength and sensitivity. The floating heavy-duty line guides increase performance and allow the rod to telescope smoothly.

FEATURES

- High module carbon wrap
- Fuji reel seat
- Heavy duty sliding guides
- USR

BOLENTINO

NEW

AVENGER PRO BOLENTINO

Designed for saltwater bottom fishing from the boat, the Avenger Pro Bolentino relies on a powerful and balanced high-modulus carbon blank and the sensitivity of the hybrid tip. All rods in the series come with a two different hybrid tips – you can adjust the action when needed by changing the tip. And when fighting the fish, the fighting butt cap allows you to brace the butt against your body for increased leverage. The Avenger Pro Bolentino series includes two 2-part rods and a telescopic version with an interchangeable hybrid tip. All finished with adrenaline-fueled cosmetics.

FEATURES

- High module carbon
- Powerful and balanced blanks
- Supplied with 2 detachable Hybrid tips
- Fighter butt cap
- Telescopic version in 310cm rod

COLD WATER IN-LINE

Designed for freshwater trolling, the Okuma Cold Water inline rod's moderate action and powerful and responsive 24-ton carbon blank are optimal for targeting agile and vigorous fish like salmon. The inline design of the Cold Water allows for a flexible structure with an even distribution of force when fighting the fish. The high-quality tip guide line material ensures the line endures stretch and stress without breaking.

FEATURES

- 24T Carbon Blank
- Fuji® DPS Reel Seat with Aluminum Double Lock
- Premium EVA Grip
- Anatomic Front Grip
